EDUCATION

Professional Foundation Online
ALX
This course provides essential skills and knowledge to build a strong professional base. It covers foundational concepts in communication, teamwork, problem-solving, and workplace ethics, preparing learners for success in a variety of career paths and professional environments.

Bsc in Software Engineering Addis Ababa, Ethiopia
Addis Ababa Science and Technology University
Relevant Course Work: Data Structure and Algorithms, Internet Programming, System Design, Computer Networking, Database Systems.

FrontEnd Developer
Google Developers Group
Participated in the GDG (Google Developers Group) React.js track, completing hands-on projects while learning modern React concepts and best practices. Collaborated with fellow developers throughout the program and took part in a final hackathon, applying our skills to build real-world solutions under time pressure.

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern 09/2025 – 12/2025
ArkHive Software Solutions Addis Ababa, Ethiopia
I was a Full-stack developer at ArkHive, where I built scalable web products and backend services. I enjoyed turning complex requirements into clean, reliable user experiences.
My main stack is Next.js and Golang, with a strong focus on AI integrations that add practical value to real world products.

Full Stack Developer 2026 – Present
ArkHive Software Solutions

PROJECTS

Driving School Management System
Next.js, golang(fiber)
Contributed to the development of an in-house Driving School Management System during my internship at ArkHive Tech. The platform digitizes and streamlines key driving school operations, including student management, instructor coordination, licensing workflows, scheduling, attendance tracking, role-based access control, and final examination management, helping improve operational efficiency and automate core business processes.

Graduation Book For AASTU ECSF
Next.js, Supabase
This project is a **digital graduation book** created for the **AASTU Christian Fellowship** to celebrate and honor graduating students. The platform provides a beautiful, organized, and easily accessible way to highlight each student's journey, achievements, and personal reflections.

Baseleal
flutter, firebase
Baseleal is a cross-platform mobile app built with Flutter and Dart for a gospel choir, giving members and listeners easy access to the choir's mezmure lyrics. It includes a photo and video gallery, customizable settings, and offline access, so lyrics and media are available without an internet connection. I designed a clean interface for simple navigation across the home, lyrics, gallery, and about screens.

SKILLS

Frontend
React.js, Next.js, HTML, CSS, Typescript, Flutter

Backend
Firebase, Golang(fiber), Postgress, Mysql

Version Control
Git, Github
